Annotation : Ush article education services at the market supreme education personal of solidarity importance , mobility about characteristics and conditional - i , superior education in the process management, tolerance about projects research made .

Key words : higher education, educational services, management, collaboration, innovative cooperation , processes.

The problems of ensuring the employment of production capacities and safety equipment of the educational services market in Uzbekistan, the higher education services market with highly qualified production and quality equipment, the development of effective methods of state regulation of the educational services market, the development of an organizational and economic system. The steady growth of the educational services sector, the production of high-quality products, the production of secondary production products, the production of high-quality products, will be an important factor in ensuring the demand for high-quality production in the production market.

The wide introduction of new innovative services in the innovative system of the economy, the implementation of important issues to ensure the safety of entrepreneurial activity. o , this organization is responsible for the commissioning and modernization of higher educational institutions, providing them with innovative educational and scientific laboratory equipment, and ensuring the fundamental quality of higher education products required in the economy and its resources based on the provision of a register of incentives for the training of highly qualified personnel. A resolution was adopted “On measures to further improve the participation of economic sectors and enterprises in improving the quality of higher education products”.

The educational services market includes the provision of higher education services, environmental protection, environmental protection, science and education services, etc.

A document of a specific, purely practical nature, related to the activities of organizations that have an impact. This includes the production process, the organization of the educational process, the production of postgraduate studies, etc.

Depending on the frequency of exposure, it can be classified as periodic and one-time. It exerts its effect under the influence of a constant frequency .

Depending on the impact, we indicate the direct and indirect quality of coexistence.

Directly, the market for educational services (competitive environment, human resources, regulatory and legal framework) directly affects the individuality of higher education institutions, while the indirect impact is of an indirect nature, for example, on the economic, scientific and technological progress or economic and cultural activity of social activity.

Depending on the financial improvement of educational institutions, the grouping of resources into two categories provides: state budget funds, which provide subsidies for private, public services, and subsidies for the development of property financial complexes , followed by private funds, which are household investments, investments and investments.

The specific features of educational activities and the specifics of the implementation of educational programs are manifested in the interaction of participants in the educational services market.

In our opinion, the implementation of its tasks, objectives and functions of the production of educational services in the educational services market is considered to be the interaction of higher education institutions with higher education institutions that provide comparable educational services .

According to Table 1, in our republic, it was 83% in 2017, and increased to 85.3% in 2018. The level of legal capacity of bachelor's graduates of higher education in the period from 2019 to 2020 decreased to 81.6%.

Table 1
Level of legal capacity of graduates-bachelors during higher education by region ¹(%)

Name of regions (provinces)	Years				
	2018	2019	2020	2021	2022
Republic of Karakalpakstan	82.4	83.0	74.8	74.9	75.9
regions:					
Andijan	86.4	84.5	91.4	93.2	94.2
Bukhara	77.9	90.8	74.1	74.6	74.8
Jizzakh	98.6	90.4	74.0	74.0	75.0
Kashkadarya	86.2	79.2	85.5	86.1	86.1
Navoi	80.5	72.3	73.3	73.8	74.2
Namangan	84.8	83.6	90.4	91.2	91.5
Samarkand	90.5	83.4	88.7	90.1	91.1
Surkhandarya	94.8	96.4	88.9	89.1	89.6
Syrdarya	85.5	84.2	85.8	86.2	86.2
Tashkent	91.4	88.4	84.2	85.1	85.1
Fergana	81.5	60.5	48.9	48.9	49.9
Khorezm	75.4	79.1	86.9	89.4	89.9
Tashkent city	84.6	81.1	85.4	86.1	87.1
By republic	85.3	81.6	81.6	82.4	84.4

In our opinion, the following can be considered as appropriate for establishing the mobility of higher education institutions :

- focus on restoring control;
- complex and systematic character ;
- valuation of objects;
- reliability, accuracy and objectivity of source data.

Based on the development of integration processes in the educational services market, scientific proposals have been developed on accelerating the processes of unifying innovative programs of scientific school institutes, standardizing qualification requirements for the quality of education and implementing the integration of science, education and production into practice, creating an environment of mediocrity between subjects of the educational services market, and on the development of the educational services market system. management mechanisms.
