Abstract : This in the article artificial of intellect study process for applicable useful study programs and personal study plans in creation of the students customized winter directions , character , goals and own abilities into account taken again to study methods about readings The article artificial of intellect personal study programs and plans in creation the students try see need and their reading , writing , attention to give , to follow to go such as general creative abilities , assistance and cooperation abilities to study and application methods are also presented . Article society in the area the students supportive useful and comfortable study programs and plans create for artificial of intellect from the possibilities use recommendation will reach .

Key words : study program , personal study plans , students , artificial intelligence , reading , writing , scientific and creative , creative ability

"We are the teacher. " like a father great always knew honored enlightener of the people our representatives . I am also a teacher , a teacher when myself for the most dear and respectful was , intelligent and modern , friendly and kind people imagination I will . Because this is for all of us teacher lesson and education giving , kind our parents in line Today on the day Uzbekistan new progress period the foundation We are creating . In this our the most close our assistants teacher and coaches , academics and creative " They are intellectuals , " he said. was Our President Sh.M. Mirziyoyev Today 's teacher is truly supreme status has to be for time with breathless without changing going from the news news to be , some in the sense artificial intellect with to equalize to receive " One " how many ten from the year then , robots of the work big part complete artificially intellect this until intensifying It goes , in the end it leaves us " It's starting to get worrying [1] " - Microsoft CEO Bill Gates Artificial intellect about debates almost 50 years ago since continue arrived coming . Experts still one to my end agreed no . Some their becoming popular people instead occupying going as a result public unemployment indicators exceed departure possible They are worried .

Experts other one group and artificial to the intellect positive in a relationship to be necessary They are singing . Every how much objection and to criticisms despite artificial intellect from development and to people help from giving It doesn't stop . Because it 's negative . sides

everyone There is something in it . Let's say , a simple from a knife kitchen equipment as use possible , weapon also used as possible . Artificial What is intelligence ? for the purpose of , whose in hand to use looking at useful or harmful to be possibility about thoughts s any intellect through Uzbek history and Hikmatulla, who is " reviving " his art Ubaydullayev [2] also stated past , he again :, ... artificial intellect development stop I don't think it's possible , and I think it would be foolish to stop .

If time with breathless wants to walk artificial intellect our study need . Himself it 's too late We are staying , everyone. day news is happening this in the field . Without learning tool no , study " need " was . Today on the day artificial intellect concept very wide For example , mobile on your device programs : Google , dictionaries , various kind games and etc. are also artificial to the intellect obvious example be takes . Only their coverage smaller to be , known one only in the direction to you help give takes . That is wants to do was your actions type looking at relevant from the program you use . Artificial of intellect today's on the day study process and training in systems big role there is , because this technology of the students constructive thinking , discussion and skill to increase help gives .

this case , artificial intellect using of the students creative abilities to develop suitable coming personal study plans and programs also possible to create gives . With this together students mastered winter directions , character , goals and own creative abilities into account taken without them supportive useful study programs and plans creator closed lessons to compose possible . In this case , artificial intellect study plans and programs in the creation students about many information pile taken without them successful to winter issuer program and the method in preparation big There is a place .

First in turn , artificial intellect using of the students creative abilities to develop suitable coming programs and plans create for students about information to ' play' received without them own personal needs to study need . Personal study programs and plans in creation artificial of intellect help with students for comfortable and useful study programs preparation These programs are possible . of the students independent and experienced to read to increase help gives and their customized in the directions the most good skill and knowledge to the level to achieve take The society is coming . today's on the day every how in the area the students supportive useful and comfortable study programs and plans create for artificial of intellect with the help of use very important .

Conclusion as in other words artificial of intellect application study process and study in systems big place holds and individual training plans and programs in creation help gives . Personal study programs and plans create for artificial of intellect application , students creative abilities into account taken , their many information to ' play' received without studying them play try see help with useful and wide widespread programs to compose opportunity gives .
