Abstract: This global appeal in the article index and foreign of countries investment attractiveness increase mechanisms analysis The country is also investment environment attractiveness increase regarding Germany of the state foreign investments attraction to do regarding experiences studied . Of them Uzbekistan under the circumstances use issues seeing out , available opportunities based on offer and recommendations was given .

Key words: global attractiveness index , investment , investment policy , investment attractiveness , mechanisms , foreign investment , foreign capital , restrictions , cooperation programs .

Foreign savings attraction to do country opportunities expands , itself with new technologies and business culture take comes . In addition to this as a foreign language investments local of the economy diversification to provide , new work their places to create and qualified worker strength to form help gives .

With this together , foreign investments through take bride innovations not only working release processes optimization , maybe service show improve the field as well opportunity gives . Of them use as a result local of enterprises competitiveness increasing , international at the market own instead reinforcement opportunities appearance will be .

Regions investment attractiveness in increasing foreign countries from experience use It is necessary . Why , to study in the process foreign investments country economy develop for how much importance good knowing to take possible .

In the world attractiveness index according to Global attractiveness of countries in 2023 index the results seeing if we are , first in the first place with 100 points Germany , from then USA (94.7) and Great Britain (92.7) with scores of Japan (90), China (89.8), Korea (84.9), Australia (83.1), Singapore (81.0) leader places occupied by Uzbekistan this in the ranking location noticeable at the level improved and index since creation since country in the ranking the most big changes record will be in 2022. Uzbekistan ranked 81st It ranked 64th in 2023. In this position , Global Attractiveness About the index (GAI) briefly information we bring .

Global attractiveness index (GAI)- this of the country attractiveness measuremen and mainly to him/her impact doer factors and strategies discussion to do for platform . GAI is government and business by of the country attractiveness assessment for used tool , because it is separate economies strong and weak sides reliable to understand opportunity gives .[8]

In particular , this world 95 percent of the population and gross internal 99 percent of the product organization 148 economies that comparable general index . Statistics point of view from the point of view of the GAI main work indicators five small to the index again

classification based on built : location determination index (IP), dynamism index (ID), stability index (IS), growth waiting index and finally 2022 in-edit-conflicts tendency of countries economic addiction level measurable index added . Eastern Europe in the regions continue arriving to conflict directly related

Like the traffic police generalizing statistic tools situation good quality and objective analysis in doing important importance They have . public from the mind independent actually , truly to the information based without working is released , so for results clear and reliable will be . The most influential international organizations by assembled information and strict methodology using shaped indexes , self in turn , wide comprehensive analysis opportunity gives .

Global attractiveness in the index leader places occupied countries between Germany separately attention worthy is , its experience this in the field successful sample as display Germany is popular among foreign investors due to its stable economy, steady growth in real estate prices, transparent and competitive taxation, and virtually no restrictions on foreign capital . Germany stands out among all countries for its ability to plan for the long term. A stable economy and a stable political structure over decades have provided the country with high international credit ratings. German legislation is transparent and well-organized, which clearly regulates the relationship between investors, sellers and tenants, as well as construction standards, levels of responsibility and requirements for documentation. This approach clearly spells out legal requirements and serves to increase mutual trust between the parties. Germany is also distinguished by its high real estate prices and low cost of financing. Germany is currently considered a seller's market, with high demand for objects, property values growing by about 3% annually. At the same time together 10 years during designated financing rate from 1.0 to 2% , very big change unnoticed . In Germany investors from the bank up to 70 percent of investments receiving funds possible .

In our country, Uzbekistan too Republic Presidential Decree No. PQ-306 of September 14 , 2023 “ Small business to develop financial and institutional support measures "about" in the resolution from October 1, 2023 " Small" business continuous support " complex program will be implemented in 2023-2026 increase for state funds 6 trillion soums from and international finance 1.2 billion US dollars from institutions dollar in the amount funds redirect planned [1].

" Small" business continuous support ” program locally investors attraction to do and their effective activity to show provide through our country economy stable to develop important contribution This program is addictive . through small business encouragement through of the regions investment attractiveness increase , increase to release modernization to make , export potential expansion , import substitution clicker products working to release develop and infrastructure further reinforcement It is also possible to have a rich natural resources and qualified worker to the power has to places capital investments expansion provide such as important to issues solution discovery is expected .

Germany foreign investments attraction to do with one in line state on a scale other to countries investment input activity take Germany capital in motion participation to be able straight away German of investments external to the markets active enter progress with is described . Production to release market near placement simple for export than much useful is considered .

In Uzbekistan products transportation expenses height because of export in doing entrepreneurs one how much to problems face Germany 's experience into account received without , foreign markets near investment placement expansion necessary . Such approach , foreign to countries active enter to go through expenses optimization , prepared products for sell market features better into account to take and effective sell system formation opportunity It also gives process from sale before preparation see and from sale next service show centers organization to reach

road opens , this and general quality further increases and buyers needs in satisfaction important importance profession Also , foreign countries with cooperation programs within our country brand further to increase we will achieve .

In our republic innovative development acceleration , economy all in networks innovations and technologies wide implementation to do , human capital , science and innovation areas develop Uzbekistan in 2022-2026 for the purpose Republic of innovative development strategy working exited . Long term programs done increase as a result to the surface coming systematic changes , especially Uzbekistan Republic science and supreme education to develop the system by 2030 aimed at concepts within the scope reforms , higher education quality , scope and potential fundamentally to the update take arrival is expected . This is modern to knowledge has was supreme educated and scientific potential graduates number sharp to increase reason will be .

Also , next Our goal is the highest educated , scientific potential of personnel innovative ideas to practice wide current to do through problems effective solution to reach is acceleration .

The area investment attractiveness increase for not only foreign investors attraction to , maybe local investors are also active accordingly attraction to do necessary . This for innovative activity developing to go strategies improvement necessary . In society innovative activity development for our scientists and even talented our students from the potential complete use mechanism our formation If we are our scientists and talented our students from the possibilities effective accordingly If we don't use it , this talents other countries by acceptance to be done As a result , talented our students abroad mold departures and other of countries to develop contribution joints probability there is .
