Abstract: Current on the day in our country tourism to the field big trust focused is coming . To this reason tourism field of the country main industry and from networks one become of the country In GDP share increasingly exceed This is happening . for countries the most first of all tourism infrastructure development need will be . Therefore countries their own existing from the potential using tourism strategies working is coming out . In our work In Uzbekistan tourism infrastructure improve for how aspects to trust to take need and how foreign experience availability illuminated . With this together tourism in the industry his/her own leader to their places has was developed countries how tourism develop from concepts being used about information cited .

Key words: tourism , infrastructure , tourism infrastructure , tourism concepts , tourism strategies .

Current on the day tourism the most progressive arrived going from the fields one is calculated . This reason tourism in the field many scientists and professors to the mind according to existing tourist from opportunities effective using their correct to work activities done increase , most less cost as from it high income to take That means . Therefore all countries tourism field to develop movement as is coming . In our country existing tourism potential to increase and from it high income to take movement does . ordering tourist existing tourist opportunity and from the comforts using his/her own travel during in our country tourist opportunity and from attractiveness pleasure to receive need will be .

Admitting this too to say must in my country tourism in the field tourists for important was tourism in the infrastructure some disadvantages encountered Initially we will build the infrastructure about well-known we get need will be . Infrastructure about for reference has we will be need . Infrastructure about many of scientists views existing become their all to oneself typical rule xab will reach . Of them one at your disposal link I want to .

" Infrastructure (lat. Infra pod+structure) Russian to the language translation is a substructure , i.e. Uzbek in the language « structure under " structure " meaning means . His general structure economic or political life organization It is all one economic and political in character one in rhythm passing life activity to provide focused on " ¹ from this this understand we get must infrastructure subnet industry become the field development and progressive to be able for necessary is calculated this because of infrastructure of the economy important from the elements one is calculated . We can any network or the field wants to develop if we are this of the industry infrastructure improvement necessary will be . Therefore , we first tourism infrastructure to develop movement let's do need . Tourism infrastructure what , its in the economy importance where at the level these to know for us many thoughts and to tariffs face

our arrival possible . Therefore our to our sermon close and we are now developing market in the economy considered important our definition below brought We passed .

“ Tourism infrastructure - it is a tourist products working release general of the conditions united is the essence . Tourism infrastructure essence when opening of experts thoughts and views various are , some of them tourism infrastructure is main technological processes provider objects or activity If they understand it as types , others and - this whole technological is a process , the third some - tourist products formation for necessary was technological processes and to him/her additional (plus) control They understand it as an effect . Exactly . mother this next complicated to the content has « tourist product » concept infrastructure main content and essence organization "will ."2

Tourism our country for big to potential has industry . Tourism infrastructure develop and tourists for comfortable conditions create through our country to the economy big contribution add possible . With this together , tourism through national our culture to the world introduction and foreign tourists attraction to do also population well-being to increase help gives .

Tourism in the country to the world GDP with related was many macroeconomic indicators in development important importance profession Tourism main macroeconomic from the indicators some saying transition permissible . Firstly , tourism gross internal adding to the product (GDP) contribution . This indicator tourism from the field country to the economy enter coming general income means . Secondly , tourism in the field employment level , that is tourism through work with provided people number . Third , foreign tourists by to the country included currency amount . This indicator of the country trade balance to improve help gives . We are tourism develop through in our country unemployment level our reduction possible . With this together to tourists various similar information sell through our population well-being our increase necessary will be . In particular in our country of tourists many to tourists various similar handicraft , attarry and jewelry their belongings sell through our country population employment level exceed is looking .

Tourism current on the day foreign many countries too attention looking at and to develop movement doing from the fields one is considered . Because tourism some one developed and tourism to the potential has countries for gross internal of the product big to the share has . This reason , tourism of the field developing and people and tourists by for trips of interest increasing Therefore , countries their own tourism potential develop and infrastructure improve for many funds and resources mobilized are reaching . The current on the day many developed countries tourist to infrastructure big attention tourism to develop big contribution is adding . To this because in the states there is natural of resources decrease and human factor development , as well as travel and to rest of interest increasing progress is considered .
