

**WHAT SHOULD A MODERN SMART TEACHER BE LIKE?**

**Nigora Abduqahorovna Kozimova**

Lecturer, Department of "Pedagogy and Psychology"

Asia International University

**Annotation:** This article presents a scientific discussion on what qualities a modern teacher should possess in today's educational landscape. Based on research conducted in the theoretical field of contemporary teacher-related issues, the study analyzes the interrelationship between various psychological perspectives associated with this matter. The article also provides conclusions derived from the results of research methods applied to studying the problem.

**Key Words:** Smart teacher, adaptability, emotional tension, stress, distress, aesthetic education, defense mechanism, student, social role, psychological states.

**Introduction**

In today's world, the role of the teacher in the educational process is extremely important. At a time when technology and information are rapidly developing, a modern teacher must embody the following qualities:

1. **Technologically competent:** A teacher must know how to use modern technologies and work effectively with digital tools in the learning process. Electronic books, interactive learning materials, and online platforms have become an integral part of modern education.
2. **Flexible and innovative:** A teacher should continuously improve their qualifications and be able to apply new pedagogical methods. Lessons should be organized by considering each student's individual needs.
3. **Communicative:** Being able to clearly express thoughts and deliver knowledge effectively is one of the teacher's key tasks. Openness and sincerity in communication with students also play an important role.
4. **Creative and inspiring:** A teacher should make lessons engaging and motivational. Encouraging students to learn, fostering independent thinking, and developing research skills are among the main goals of today's educator.
5. **Responsible and knowledgeable:** A teacher must be aware of their professional and personal responsibilities, continuously update their knowledge, and be a role model in terms of ethical behavior.

A modern teacher is a guide preparing students for the future. Through knowledge, experience, and human-centered attention, they must be aligned with the demands of the time.

As the global education system rapidly evolves, new requirements emerge for today's teachers. Advanced technologies, modern pedagogical approaches, and students' needs have a significant impact on teaching activities. Beyond the qualities mentioned above, what else characterizes a modern teacher?

**1. Technological literacy**

Digital technologies play a central role in modern education. Therefore, teachers must know how to use computers and the internet efficiently. They should be adept at using online platforms, distance learning tools, video lessons, and e-books, while constantly updating their digital teaching strategies.

## **2. Adaptability and innovation**

Every student learns differently. Thus, modern teachers must adapt lessons to students' needs and apply innovative pedagogical approaches to facilitate effective learning.

## **3. Continuous learning and professional development**

A modern teacher should regularly update their knowledge and master new teaching methodologies. Participating in conferences and seminars helps expand professional competence and enhances the learning experience they offer students.

## **4. Student-centered approach**

Today, the student is at the center of the educational process. Teachers must consider students' interests, abilities, and learning pace when planning lessons. The goal is to support personal development, strengthen knowledge, and cultivate independent thinking.

## **5. Communication and collaboration**

A modern teacher must be an effective communicator—not only with students, but also with parents, the community, and other educators. Understanding students' needs, listening to their opinions, and supporting their development are essential professional skills.

## **6. Creative approach**

Teachers should make lessons engaging, creative, and inspiring. Using games, creative assignments, projects, and interactive methods encourages active participation and makes learning enjoyable.

## **7. Ethical and social responsibility**

Teachers educate students not only academically but also as individuals. Therefore, they must uphold moral values and instill responsibility, honesty, diligence, and civic duty in their students.

## **8. Psychological preparedness**

Understanding students' psychological states and emotional needs is vital. A modern teacher must be able to support students in the learning process and apply flexible psychological approaches when necessary.

## **Conclusion**

A smart teacher is not only a transmitter of knowledge but also a mentor guiding students' development. They must adapt to the demands of the era and technological changes, continuously develop themselves, and remain open to creativity and communication. At the same time, they must recognize their responsibility in educating the younger generation and convey knowledge and culture through thoughtful and innovative approaches.
