Key words: Choi abuse of sports, presidential decree no up-5887, speed power capability test standard football, BO'SM, coordnation the action of natural selection, quick thinking, volitional qualities, talent, agility, endurance, strength, agility.

To enter. Football today's day in young people and adults loved and involved in sport to the type of turned. Young people professional football with concentrate to our government by the necessary decisions and decrees work out. Uzbekistan Republic President 2019-4 years-in December, "uzbekistan's football and the development of unconditionally new level olibchiqish measures on" UP-5887-dated decree on the basis of our country in this sport, the type of more developing has been. Recent years of our people 's health about care to, spiritual and physical harmoniously developed generation, explain the formation, the million game toe`present and in our country, a special place that keeps the sport of football to the type of population, especially young people wide to attract to on a number of measures out oshirilibkelmoqda.

The actual ministry. Children between the football game wide spread. In particular, children and youth sports school football toe`of education all applicants of the reception to make able , not even this with is caused. Because of this school, the main function by selecting obtained children kontengenti with work, high skill players provide ready to. Natural selection assistants in the preparation of the problem to solve , it does not. This case cannot, children with a range of skillful ya`see, generally, special quality on yitarlicha was not prepared, but high ability to have who have children also football school leave is going to.

Purpose. Youth football to attract to and them mass ravshda coming provide. Special tests through talented young people of football, the sport , the type of selection and qualified players preparing giving it consists of.

Study a level. Ko`pgina coaches most able children choose to get to different criteria use, however, these criteria many cases one - way or sub'ektiv position will be. This with together and choose to work in general about the cuts in and out will go or ko`pinch , coaches the children of the control in the game show and avvalda decide composed of technical-tactical skills and skills depending on the work they are doing. The child of speed-power qualities and actions koordinasiyasi, quick thinking, irodaviy quality high 34 degrees, as well as new material quickly mastered to get based on the ability of hisobgaolinmaydi.

Obtained results. Of the surveys ko`rsat in fact, such children are as you know, the football section when he enters the technical and game indicators really high level and will not be, but physical and psychological factors of high level because of the reason, their technical-tactical skill quickly grow.

First in the competition apply can toe`present complex indicators are there. Thus, six tests and

indicators includes.

1. Importantly, ko`pinch congenital , which is the running speed. Efficiency , the quality of assessment for 30 meters running aanbevolen is.
2. Ability nirivojlantirishda efficiency-power the ability of large a role o`ynaydi. It ran came, two feet depsinib which case up to the jump height by assess can.
3. Important of quality , one that is agile. His 12-13 years of age after the development difficult toe`ladi. Choosing general and special agile interaction into account them to take you need.
4. Special koordinasiya dribbling by is determined. (5 , 11 cheat skip).
5. The most important spiritual quality of one of the game 's perception of it is you know and the next is to take.

6. The selection of the last stage ko`rsatkich of this – “o`yin severe and the combat quality”.

The second stage of the young players selected to get methods.

Selection of second stage yoshfutbolchilar from within christian talent by separating is obtained.

This goal is to accomplish an increase to the first stage of the tests, positive results does not give.

Analysis that ko`rsat demonstrates, the ability for the development of assess to somewhat different within as from used should be.

1. `Top a foot with a long distance with a blow to give – 3 times. Most good results into account are taken.

2. Technical for the test. From the corner of the penalty area to the center of the ball, taking , walking, from each other 3 meters away , located obstacles “cheat” was, to the gate of a shock give. Left and right corners two life - the chance is given. Of the ball into the gates have entered should. Most good results into account are taken.

3. Special koordinatsiya for test. The ball with the circle less time spending many “cheat“ o`teeth. Two opportunity for a good result to take into account is taken.

4. Total interaction, resistant to assess 300 meters running with out carried.

5. O`yin the activity of assessing psychological and physiological research methodology`llab that method is used. Average results 10-12 attempts from then is determined.

Conclusion. Football sport to the type of young people selected for getting the first and the second stage test miyorlaridan using without done increase should. Talented young people in the future of our football future is. Them to choose the talent of the occurrence , production and test miyorlaridan on the use needed. Young football identify and hidden talents of the occurrence in the production of further members to improve the national team 's ranks , adding it is.
