

**DIGITAL LEARNING TOOLS ARE AN IMPORTANT TOOL IN IMPROVING THE
SYSTEM OF EXERCISES IN MOTHER TONGUE EDUCATION**

Omonova Dildora Nekmurodovna
Lecture Asia international university

Abstract: This article will focus directly on the role and importance of digital technologies today. The opinion was expressed in native language lessons that it is very relevant to puncture classes through digital technologies.

Keywords: digital technology, native language, media education, platform, tablet, electronic whiteboard.

Today, there is no field that has not been directly penetrated by digital learning tools. The ability to use digital technologies directly makes the work process more efficient and productive. Using digital technologies in the classroom directly increases the effectiveness of the lesson and saves time. As the head of our state noted, "Education and education, science, health, culture and art, sports development issues, deep knowledge of our youth, thorough acquisition of foreign languages and modern information and communication technologies remain our constant priority¹" analyzes show that the use of digital technologies is the easiest and most convenient way to work individually with the student during the course of the lesson.

Media education teaches students to think independently, develop creative activities, obtain information, process it, synthesize it, and draw personal conclusions. Press, Television, radio, Film, video and internet are being brought into classrooms, all of which are helping to organize the educational process in the name of mediators. Media lessons have a number of methodological opportunities and advantages, and in the learning process, the teacher has the opportunity to simultaneously provide theoretical information and demonstrate materials using modern high-tech means².

Today, the world is moving to the digital world network in a very intense way. Tablets, mobile phones, smart watches, virtual glasses have entered the life of today's generation of young people. Our Digital Life is growing. Teaching requires strong knowledge, skill, organizational skills from the teacher. It also depends on whether the teacher can make the most of the educational tools in achieving the didactic goal that he set himself. Digital technology today:

- a tool for effectively delivering information and knowledge to students;
- a tool for creating educational materials;
- a tool for effective teaching;

-a tool for creating a new learning environment.

Digital learning tools are key to improving the mother tongue exercise system in an interactive, personalized, and automated way. They increase the effectiveness of education by reinforcing grammatical rules, quickly analyzing control work, and developing creative and critical thinking in students³.

Benefits of digital tools in mother tongue education:

- **Interactive exercises:** Interactive tasks on grammar, spelling, and style help students master the subject matter more quickly.

- **Individual approach:** Digital technologies allow you to select tasks that match the student's level. • •

Quick feedback: Time is saved by automatically evaluating control works and tests, and results are quickly analyzed. Universal international scientific journal • **Media literacy:** The use of multimedia tools helps students develop their speaking and communication skills. The use of digital technologies enriches traditional education and increases motivation in mother tongue lessons

Conclusion: It is useful for the moral education of young people to refer students to video riddles, video dictations on humanity, video texts, and video images, and to encourage them to think about them. At the same time, such humanitarian processes develop their competencies in applying the theoretical knowledge they have learned in practice.
