Qulimuratova Anvara

Third-year student of the Practical Psychology program

Abstract : This in the article person communication in formation his/her age , gender, profession , worldview into account to get , each young to the period incoming to people to oneself typical words application , in which of the word impact strength , temperament (client) characteristics of the individual looking at communication methods of application importance about idea maintained .

Key words : communication , success , personality , quality , age , gender , profession , worldview , family , neighborhood, community , group .

Communication art all alive to living beings typical considered, only at the human level

Communication in a person's real life social to the activity

itself typical forms as acting together , but some in the situation they are

different from each other independent accordingly done increasing process is considered .

Communication in the formation goal right to be put necessary, communication education in the process various kind in situations develops . For example, in the family , in the community and various district in groups . Communication human of existence is the basis .

The whole person in the formation of communication importance big . Simple things study through imitation for mutual in communication to be necessary . Society to the laws and regulations based without relationship develops . Individual with person communication between very big the difference see possible . For example , a baby , a mental sick , mentally retarded of people communication with mature developed , consciousness high someone's communication between big There is a difference . Conscious person communication from the beginning before in the brain thinks , his words plans . Person physical , mental , moral and aesthetic in development of communication place big .

For example , moral development for in the family , at school , in kindergarten to the child adults communication through impact They also do aesthetic , mental , physical develop for to the student teacher communication through impact tries to communicate . So , communication impact to do tool to serve as well does .

Person communication in formation his/her age , gender , profession , worldview into account received without work take to go For example , we need to of age to children for adults relatively user words We don't use it . Every young to the period incoming to people to oneself typical words is used . In this of the word impact power into account The temperament (client) characteristics of the person are taken into account . looking at communication methods application big importance has . In person skills , knowledge , qualifications harvest in being of communication place incomparable

Person communication in the formation his/her upbringing level important place For example , to a person strong impact enough words Even if you apply, it will be accepted. not to do , your gave to your instructions action not to do possible . Because he was young treatment culture possession Communication is necessary . in the formation goal right to be put necessary . Communication education in the process , various in situations develops . For example , in the family , in the neighborhood , in the community , in the group . If in the family adults to each

other rude in a relationship If they are , the child will imitate them . those around with to conflicts progress possible . Comprehensive developed , mature , perfect person (person) upbringing for the youth free thinking as adult to deliver necessary . So , communication thinking with integral related without is formed .

Person's in the formation of communication importance about psychologist scientists own thoughts statement In particular , psychologist BG Ananov " Adam of knowing subject as " in the work this issue deep analysis He is the one who has knowledge . various elements possession successful of mastery pledge that emphasizes . Knowledge possession communication through done also hoping for an increase will pass . If people mutual to each other information if they do n't pass on their experiences communication through if they don't exchange underdeveloped to stay about BG Ananov reasonable thoughts brings .

BG Ananov in my opinion communication social and is an individual situation . Therefore for speech with integral related , communicative task in execution pantomime , gestures communication forms as to the surface It turns out . So , the scientist communication the concept general , young and pedagogical psychology such as sciences for deep analysis as given . Present at the time in our country and abroad communication to the problem interest increasing is going on .

Market economy under the circumstances of people each other with to do communication big importance Psychologist scientist V.N. Myasishev communication to the issue deep approached him studied . Other scientists communication speech communication with tied learned if they are , VN Myasishev communication process as learned . That is. of individuals to each other communication through impact show each other perception to do object as analysis does . His opinion : " Person various in relationships opposite adjectives manifestation to do " It's possible ." Experienced psychologist AA Bodalyev and person in play , in reading , in communication , that is of activity various in the fields his/her own instead knowledge the necessity He is a " Personality " and society » in the book this to the point big attention giving , this problems less studied emphasizes . AA Bodalyev According to him , " man communication through in upbringing this to him/her how impact to do from the beginning to think necessary . Communication successful in being person's formed qualities , virtues importance very big . Including , in person positive qualities good formed (courtesy , humility , humanity , correctness honesty , conscientiousness etc.) communication process good will pass . Because individuals each other right their understanding for , communication successful to be for they sincere to be necessary . Sincerity human the most wonderful from the virtues one to events reasonable in a relationship to be , different to the effects is not giving in .

The whole person in the formation of communication importance big is considered . Simple things study through imitation for mutual in communication to be is necessary . Society to the laws and regulations based without relationship developed goes . Individual with person communication between very big the difference our vision possible . For example , a baby , a mental sick , mentally retarded of people communication with mature developed , consciousness high someone's communication can if we are, their between big difference that there is our vision possible . Conscious person can if we are, it communication from the beginning before in the brain thinks , his words plans .

Person's physical , mental , moral and aesthetic in development of communication place For example , moral development for in the family , at school , in kindergarten to the child adults communication through impact They also conduct aesthetic , mental , physical develop for to the student teacher communication through impact tries to do so . for , communication impact to do we consider it a tool possible . Communication art human of activity the most important from the means is one . Effective communication to do ability - each human possession need was art is considered , especially in the future medicine employee professional knowledge with together patients , their relatives and each other with effective communication to do to learn need .

That's it. separately highlight okay , communication art management activity the most important For the leader the most difficult situation the conversation managed If he is an employee listen If

not, then lead the conversation. The leader will not take the conversation from the beginning before employee mood identification, family conditions ask, then question with appeal to do. If you want to have a conversation command from giving if it starts conversation successful. It won't be. Some in cases employee with leader between conflict come output possible. Reason leader to employees manners with appeal does not.

Children from youth first of all in the family, then education in their homes to communicate teaching will be sent. To the communication of teaching from the methods one communication skill training in the style of The child is in kindergarten. Under the circumstances educator various training passing to communicate teaches. First elementary himself to hold, for adults how to speak, hello giving, gratitude to inform such as methods content finds. School age during and later person socio-psychological trainings through to communicate is taught. The person himself/herself this to methods positive attitude to express, to act actively necessary. Because person in communication without activity subject as an individual human being as well as full-fledged develop can't. AA Bodalyev in my opinion, even game child communicates in activities Education process based on to communicate to teach issue. It costs. Labor time in the process people always to communicate need. They feel. The communication educational importance is that it is human worldview expands and psyche develops. That is, all mental processes are formed through communication.

The goal of communication formation should be set correctly. Communication develops in the process of education, in various situations. For example, in the family, in educational institutions, in the neighborhood, in the community, in the group. If adults in the family are rude to each other, the child will imitate them and try to be rude to those around them and will get into various conflicts. In order to raise a fully mature, perfect person (individual), it is necessary to form the art of communication in young people in order to raise them to be free-thinking. Therefore, communication is formed inextricably linked with thinking.

Currently, interest in the problem of communication is growing in our country and abroad. Market economy under the circumstances of people each other with to do. Communication is very important. has is considered. NPAnkueva to the mind according to, other people with in communication each person certain social role. Roles person's nature full open to give or him/her disguise possible. Speech art first of all, correct, literary language to the standards action did without from speaking consists of. Speech of art high level civilized someone's inseparable from the characteristics is one. Our speech improvement for each of us important from our duties. This is one of them. for in pronunciation, word from the forms in use, sentences in the making mistake not to do for always our speech following we go need.

Communication culture language of science relatively young from the fields is one. Active social to activity wide people attraction to do their communication culture to increase attention requires reinforcement. Treatment culture social event is a society, science, and technology, cultural and literary life development with closely garden without progressive Society members cultural level. As he grew older, his speech became more polished and refined, and his speech culture rules and to the standards appropriate without improving goes.
